Company Profile

The Bird Home Automation Group develops, produces and markets high-quality IP video door intercoms under the trademark “DoorBird” around the world. The company was founded by Sascha Keller and Bernd Müller in 2014. Both Founders gathered many years of experience in IP video and IP door communication in well-established companies, e. g. Telecom Behnke GmbH, 1000eyes GmbH and 1000hands AG.

The company’s headquarters and production site are located in Berlin, Germany, with a sales office in San Francisco, USA. The Bird Home Automation Group employs today over 120 staff worldwide who develop high-performance solutions for intelligent doors. The product portfolio includes future-proof IP video door intercoms which are made from corrosion-resistant precious metals and manufactured in Germany according to the highest quality standards. The company delivers door communication products worldwide for single-family residences, large residential complexes and commercial buildings.

Milestones

- 2009:** We launch the world's first door intercom system under the brand name "1000eyes" that works with standard smartphones (iOS, Android, Symbian) and desktop clients (Windows) as end devices.
- 2011:** Launch of our new generation of door intercoms under the brand name "myintercom".
- 2014:** Worldwide launch of the "DoorBird" brand and the foundation of the company Bird Home Automation GmbH in Berlin, Germany.
- 2015:** We establish a new sales office in San Francisco, USA, and present our first DoorBird IP Video Door Station at the Consumer Electronics Show (CES) in Las Vegas.
- 2016:** We develop numerous Smart Home integration solutions and expand our product portfolio with the IP Door Chime.
- 2017:** Production launch of the D21x generation of our door intercoms in new design and other IP add-on products.
- 2018:** We launch our first IP intercom that combines a keypad with one call button (D2101KV), and our first device with an info module (D2101IKH). In the same year, we develop the IP Upgrade D301, the world's first IP Upgrade for classical, analog door intercoms of conventional brands.
- 2019:** Market launch of our first IP Video Indoor Station A1101 and intercoms with multiple call buttons.
- 2020:** Worldwide release of our smallest model D1101V (surface- and flush-mounted).

DoorBird App

With every ringing at the house entrance door, the user receives a push notification on his mobile end device (smartphone or tablet) and can immediately speak to the visitor and see him on his display. With DoorBird, existing classical installations such as door chime or electrical door and gate opener keep their full functionality, and, in addition, can be controlled via the App.

Integrations and Compatibility

Our IP video door intercoms can be used as stand-alone devices or integrated into the existing smart home platforms. The DoorBird products work, among others, with KNX, Control4, Loxone, Crestron, Synology, QNAP, Grandstream, URC, RTI, ELAN, Fibaro, Bang & Olufsen etc.

DoorBird Product Portfolio

The product portfolio of the Bird Home Automation Group includes a wide range of intelligent IP video door intercoms for single-family homes and apartment buildings as well as large residential complexes. From compact entry-level models to classic call button door stations and universal keypad models, every user will find the right door intercom system for his or her home. The call button models are available in different colors and finishes.

The DoorBird door intercoms receive additional useful functions when combined with our accessories. Our IP Indoor Station A1101 complements any environment and is an ideal addition to any DoorBird system.
